Description

Like the first Common People pack, Common People 2 pack continues to help you populate your scene with more people and accessories done in a colorfully fresh style! This pack contains 4 female and 4 male characters with each having at least 8 different texture variants. This pack also contains various bags, hats, glasses, a scarf, two umbrellas, and a mobile phone. All characters are rigged, animated and mecanim humanoid compatible. Additional accessories are all wearable.

Like all Supercyan character packs, this pack includes over 310 high quality animations. Pack has two animator controllers (state machines), one for simple movement and one for more advanced movement, wielding and aiming.

Common People 2 is a stand-alone pack and does not require prior Common People release to work. However this pack has been designed to work and fit with [the prior release](#) and other Supercyan packs like [House Pack: Furniture](#).

Details

- 8 Mecanim humanoid compatible character models
 - Characters average vertex count is about 2184 and triangle count is about 4182
 - Rig contains 28 bones
 - Rigs created with four bones per vertex for optimized performance
 - No transparent textures or backface-culling used in characters
 - FBX version 2011
- 23 Additional items which can be used as wearable items
 - Additional items average vertex count is about 455 and triangle count about 868
 - Glasses, that have lenses, have optional transparency in the lens part (as multi-sub material)
 - Glasses have “no lens” versions with no lens model in them
 - FBX version 2011
- Over 310 mecanim humanoid animations
 - Full animation list can be found on our website
www.supercyanassets.com/animations
 - All animations animated 60 frames per second
 - Simple animator controller with all the animations
 - *Note: Compatibility with humanoids outside Supercyan character packs not*

*guaranteed*

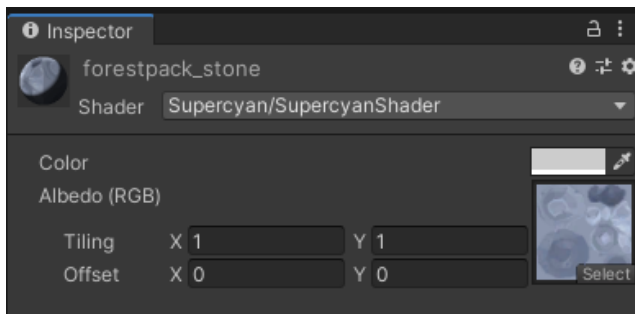

- Ten 1024x1024 textures for each character
 - Eight for body, two for head and hair
 - Photoshop (.PSD) files with UW maps included
- One 1024x1024 texture for each additional item
 - All 6 glasses share one 1024x1024 texture atlas
- Multiple materials for each character
 - Eight for body, two for head and hair
 - High and mobile quality versions of each material
- Multiple prefabs of each character
 - Basic prefab
 - Prefab with simple movement script and animator controller
 - High and mobile quality versions of each prefab
- Test scene featuring all characters and animations
- Pack uses a custom made Supercyan Shader in all character materials.
- Older Supercyan “CelShader” can be found in the folder **supercyan/legacy/celshader**.
- The Supercyan Character Maker tool can be found under **Tools/Supercyan** on the toolbar tab.
